Have you ever wondered exactly what happens when you make a change in your approach? Do you really know how accurate you are? Do you wish to better your performance by eliminating your weak spots? Turbo Tech, a USBC Certified Training & Development Center, now features KEGEL SPECTO Bowling™, a LIDAR based system that reads ball position on the lanes with high precision accuracy. SPECTO records data from both lanes at Turbo Tech which is then displayed and interpreted by our coaching team using a desktop application. KEGEL SPECTO Bowling™ provides shot related data to bowlers and coaches but also provides amazing practice tools to allow people to focus, practice efficiently and improve faster. Bowlers can easily evaluate their performances with before and after reports and choose the right path to follow.
